

Hello!

In this video, I'll walk you through where to find the specific products you'd like to order.

Here's what to do.

First, you'll need to log into your allmoxy account at panhandledooranddrawer.allmoxy.com.

Or you can log in by going to Panhandledoor.com and then clicking the ORDER ONLINE button at the top of the page. Then select the second button titled LOG IN HERE.

Once you've logged in, you should be at your accounts homepage.

To begin you'll want to select the little blue "Create New Order" button, in the lower left corner of the page.

This will bring up the ordering page with the product categories. If you've been with us awhile, you'll notice that things might look a little different than you're probably used to.

We've rearranged and organized the categories to hopefully be more intuitive and make it easier to find what you're looking for.

In the Main categories section, you can see we've arranged everything in the following sections: Doors, Drawer fronts, End Panels, Trim & Molding, Cabinet Boxes, our Paint Store, and Specialty Products.

Let's look at the door section first.

You can see that the doors are broken down next by the type of materials used. First solid wood panels, then engineered panels, HDF products, slab doors, glass doors, samples, and micro shakers. Once you select the type of door you're looking for, such as solid panels, you'll then find all the specific options for door styles in that material, including doors that have custom split panels for when you want different sized panels for taller, multi-panel doors.

Each type of door will be organized based on panel material, so mitered and applied molding doors with solid panels will be found in the solid section as well.

If you want an engineered panel product, you'll need to go back to the main door page and then select the correct category. You can see the layout follows the same pattern.

This layout pattern will be true for both the drawer front categories as well as for end panels.

For edgebanded doors and drawer fronts, you'll need to select the Slab product in either doors or drawer fronts. This will give the option for both solid wood slabs as well as plywood products.

You can also select the grain direction of your products at this level. The default grain direction of all doors will always be *vertical* and all drawer fronts will be *horizontal*, unless you select a product that specifies otherwise.

Drawer boxes will follow the same suit where you'll first select the type of material and then the specific style of product. Such as solid wood, then U-shaped drawers.

You may notice that your product selection is missing some of the things shown here, such as cabinet boxes. This is a brand new product we've started offering! We now offer many options for precise flat-pack, ready to assemble cabinet boxes and casework. If you're interested in learning more about these or other products you see here, you can contact the office.

And that's it! Hopefully these category changes will help you find exactly what you're looking for quickly and easily when placing your next order.

If you still can't find what you need, reach out to us at customersupport@panhandledoor.com or call our office and we'll be happy to help you further.

Thanks for watching this video and thanks for being a Panhandle Door customer!
